

KFGL35

The **KFGL35** has been developed as a super-service-friendly coupling. Assembled rather like an engineer's Lego kit, every element of the product is replaceable if damaged or worn out. Yet it has the robust nature of a heavy duty coupling with many of the features and benefits of the cast couplings; oil damped energy store, cast bearings, bespoke damper, easy-fit breakaway cable, comprehensive range of towing heads and eyes etc.
