

250x40 SPREADLEVER BRAKE, AUTO-REVERSE

As part of our continual improvement programme the brake shoe and automatic reverse carrier has undergone a design change. This will be a transitional change in order to standardise production on the brake shoe assembly that can be used with or without the automatic adjustment (ANS) option.

The existing part number for the 250x40 sliding shoe remains the same, for example:- Sliding shoe. Part Number 25772.01. Beral 1548 lining.

- * The **current** complete brake shoe assembly comprises:-
Brake shoe 25375.01 and brake shoe carrier 25137.
- * The **new** complete brake shoe assembly will comprises:-
Brake shoe 411341.001 and brake shoe carrier 411346.001.

- * The above detail has been supplied to identify the changes.
The brake shoes are only available as complete assemblies.

The change will not affect fit or function and is fully compatible with existing spreadlever brakes and backplates.

The existing spring kits are also compatible with the new design brake shoe assembly.

This change will be actioned on axle assemblies, brake assemblies and aftersales brake shoe kits.

Note. Shoes are not sold as individual items but as part of an aftersales brake shoe axle set kit.

Please do not hesitate to contact us if you require additional information.
